I am a motivated software engineer with the ability to challenge others and myself to develop solutions to problems and situations. I am driven by growth within this field of work. I have shown strong leadership skills with an understanding of both individual and team goals to collaboratively work towards a common goal. My overall goal as a software engineer is to simplify solutions to technology's complex problems and use the knowledge I already possess to keep improving the quality and ease of work through software development. I also have strong organizational skills that allow efficient progression and division of tasks amongst my peers and myself. My objective is to obtain a position that will allow me to utilize and apply my experiences to achieve any task or goal that is set ahead of me.

SKILLS

HTML, CSS, Vanilla JS, MongoDB/Mongoose, Node.js, Python, JavaScript, Express, React.js, React Redux, SQL, Sequelize, PostgreSQL, Firebase, G Suite, Microsoft Suite, Adobe CC suite

EXPERIENCE

Software Engineering Fellow

Oct 2020 - Jan 2021

General Assembly Software Engineering Immersive - (Remote)

Participated in a full-time immersive, 3 month software engineering immersive, completing in-class projects, hackathons, and personal projects focused on real-world applications of data science principles and best practices. Developed a portfolio of individually and collaboratively focused in-class projects, including:

- [Life Lessons](#) : React-Redux-Firebase site is based on making posts about an individual's life lessons. The website allows users to share posts to the homepage for all to view.

- [Focused Daily Organizer](#): Collaborative team project created with Postgres, Express, React, and Node.js for an app that allows users to create todo lists, add sites to bookmarks, and allows a user to check the weather with api data to display the current forecast.

- [Cake Baker Blog](#): Full stack app created with MongoDB, Express, React, and Node.js specialized for a baker to share their content. Users can sign up and are allowed to comment on posts as well as modify or delete their comment.

- [Studio Ghibli Api](#) : My very first website created to display objects from an api. This project includes skills of JavaScript with basic HTML & CSS.

Pharmacy Technician

May 2018 - Sep 2020

Optum Infusion Services - (Denver, Colorado)

- Managing pharmacy inventory by checking pharmaceutical stock to determine inventory level; anticipating needed medications and supplies; placing and expediting orders
- Protects patients and employees by adhering to HIPAA regulation and infection-control policies and protocols
- Organizes medications for pharmacist to dispense by reading medication orders and prescriptions; preparing labels

EDUCATION

General Assembly

Software Engineering Immersive, 2020 certificate
